Dear Mr Worley,

Thank you for speaking with me at the Long Clawson consultation exhibition of the current version of the Melton Local Plan.

I appreciate you had to leave and wished I had attended earlier. Thank you for offering to meet with me on Friday 11th August at 11 am, I look forward to meeting you then to discuss the matter.

As you will gather from our brief discussion, I have concerns that the views of Historic England have not been adequately considered for site LONG4 in the Local Plan site assessment process and in the planning application itself. I have summarised these concerns in the paper letter I gave you (which had the relevant documents attached) and in the digital copy of the letter included here which I send along with the Historic England letter.

I have not included the relevant sections from the LUC report or the sections from the consultation appendix that the letter refers to, I don't have the software to extract the pages from your reports..

Thank you for considering this matter.

Yours sincerely,

Dr Anthony Cooper
