

2 weeks to read a 159 page document is not enough time! I work full time and have livestock to care for too.

I do not have time to cross reference all the questions to the paper and government guidelines. It's an imposing task!

I need to say that there is no way that traffic congestion be reduced and pollution reduced when there is expected to be a rise in housing and population, and transport links. These totally contradict the policies for pollution and congestion.

Debbie Green
